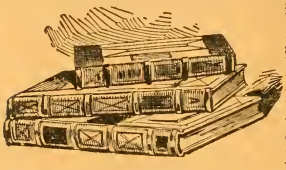
"How Business is Done."

That's the name of a book that should be worth its weight in gold to any one not thoroughly familiar with what it teaches. Every young person about to enter a business office, and many persons already in business, will find in it information that no business man who would become really successful could do without. It tells about "little things," to be sure, but they are of vital importance. There is nothing theoretical about the book. It is thoroughly practical from beginning to end. It tells, for example:



What to Do and What Not to Do in Writing Checks, as well as How to Stop Payment on a Check and How to Get a Check Certified. It explains How to Keep a Bank Account, How to Buy a Bank Draft, What Forms of Endorsement to use. It tells things about Contracts and Receipts that every one should know, tells about Guaranteeing Others' Paper, about Collateral Notes and Judgment Notes, about different ways of Remitting Money, How to Draw Through a Certain Bank, what "Kiting" is, the difference between National Banks and Savings Banks and Trust Companies, about the Care of Trust Funds, What Money is "Legal Tender," How to Detect Counterfeit Coins and Counterfeit Bills, How to be Accurate in Counting Coin and Currency. It tells about Domestic and Foreign Exchange, about Clearing House Practices, about Worthless Checks, about Currency Certificates and Clearing House Certificates, about the Working of Building and Loan Associations, about Letters of Credit and Traveler's Checks and Express and Postal Money Orders, Cost of Shipping by Express and by Freight, How to Ship C. O. D. by Freight. It explains a systematic way of Keeping Track of Correspondence, Orders, etc.; tells about Commercial Agencies, about the Organization and Voting and Stock of Corporations, about Stock Exchange and Board of Trade Practices, etc., etc. The volume is illustrated with numerous engravings of business forms, etc. Price of book, best cloth-bound, $1.00.

Albert H. Snyder, the famous advertising specialist, says, in his folder on Ad. writing:

"The value of advertising is being recognized more and more every day. Millions of dollars are annually spent in advertising and many millions more are made through this expenditure. If advertising plays so important a part in business success isn't it of the utmost importance that the advertising be of the right kind? It is safe to say that there is no business that cannot be increased by good advertising."

Ever Go to Meeting

and feel embarrassed, or "out of place," because you couldn't say what you wanted to say, because you didn't know how to make the motions you wanted to make, because the other side made things go the way you didn't want them to go? You ought to study up on "rules of order." You certainly require a knowledge of parliamentary law, no matter what your position in life. Even though you are not a member of any organization, you may have occasion to want to know, if you don't know, for instance:

How to Organize a Society, How to Effect a Double Organization, How to Elect Officers, and the Duties of the Various Officers, How to Make out a Treasurer's Report, How to Introduce Business, How to Make Proper Motions—Subsidiary otions, Incidental Motions, Privileged Motions, etc.—How to Renew a Motion, What it Means to Postpone a Question to a Certain Day, or to Postpone Indefinitely, or to Lay on the Table, or to Commit, What it Means to Suspend the Rules, How to Reconsider a Proposition, How to Make Nominations, What to do when You are Appointed on a Committee, or when You are asked to Preside, How to Draw up a Constitution and By-Laws, etc., etc. You will find all this, and much more in

Lyons' Manual of Parliamentary Law.

This book is doubtless as complete as any volume of the kind ever issued. At the same time it is more conveniently arranged.

All matter on any subject is found in one chapter and not scattered throughout the book. Part of the book is given up to illustrations of how the subject may be taught in classes, making it a valuable text-book for schools and colleges, as well as a practical guide for officers and members of deliberative assemblies. It's plain and simple. It is in every respect up to date. Consists of 112 well-printed pages, and is handsomely and substantially bound The price is but 50 cents.
